

OUR CLASSROOM

Can I use AI on this?

Check the AI Level on your assignment. Not sure? It's Level 0 until you ask.

0	No AI Do this on your own. No AI tools at all.	Examples: Tests and quizzes, in-class work, journals, exit tickets
1	AI for Ideas Use AI to brainstorm or ask questions. Everything you turn in is your own work.	Examples: Brainstorming project topics, thinking of questions to explore, getting started on an idea
2	AI as a Tutor Use AI to explain concepts or give feedback. Write every answer yourself.	Examples: Explaining a concept you are stuck on, practice questions, reviewing before a test
3	AI as an Assistant Use AI to help edit, organize or check your work. Tell me how you used it.	Examples: Checking grammar and spelling, organizing your work, formatting a presentation
4	AI as a Partner Use AI fully as directed. Check its accuracy and explain how you used it.	Examples: Projects about AI itself, checking AI answers for mistakes, assigned AI explorations

Before you trust AI, CHECK:

C Compare with a reliable source

H Hunt for real sources

E Explain it yourself

C Consider bias

K Know your AI Level

Levels 1–4 apply only to school-approved, age-appropriate tools. Never put student information in prompts.
